

Male Amobile Panther - Born Feb 2022, Purchased by Stephanie in Oct 2022 from breeder, sold on KSL & purchased on Dec 30 2022 - Friendly but shy, does not like to be held with hands, get out by using branch, will freely climb on you from there, is a shy eater									
Date	Day Temp (F)	Day Humidity	Basking Temp	Night Temp (F)	Night Humidity	Behaviors to Note	Suppliment	Ate	Poop Notes
1/6							calcium		Light orange urate, solid poop
1/7							Rapashy LoD		
1/13						Slow in morning to get to basking sot, stays in sleeping spot for about an hour before moving. Yesterday almost fell off branch	calcium	2 crickets	
1/14						Trying to climb out of cage when dooris open. Looking for higher place to be?	calcium	1 horn	
1/15							calcium		Light orange urate, solid poop
1/17						Can see red veins in mouth? Maybe more saliva than normal, took at least 1.4 hrs to move from basking light in morning. Went to bed 1/5 hrs before lights turned off	Rapashy LoD		
1/18							calcium	1 silk, 1 horn	Hydrated urate, solid poops
1/22						Eyes closed around 5 pm, lights not out yet, in sleepoing spot	calcium	?	Found a few days old poop, urate was mostly white
1/23						Eyes closes around 5 pm, lights not out yet, in sleeping spot	calcium	1 horn	
1/24						Almost fell in morning when getting up, arm hanging when climbing on branch. Put heater in room to try and bring up ambient temp incase he is too cold during the days. Will see if this aids in his behavior changes	calcium	1 super	Hydrated urate, 1 poop was hard and seemed dehydrated
1/25	72	50	80s	60s	80s	Started moving around 8:20 am, climbed down near bottom of enclosure, slupped and hung there for a while, near his sleeping spot	calcium	1 super	
1/26	72	50s	80s	60s	80s	In sleeping spot at 4:45, eyes closed, lights not out yet	calcium	1 super	
1/28	72	50s	80s	60s	70s		calcium	1 horn	
1/29	72	48	83	66	85	Moving around about an hour after lights turned on, in sleeping spot at 1:45- eyes open; eyes closed at 2 & 3. Didn't become alert when Brett and I walked in room to check on him. Temp and humidity where they need to be, misted enclosure for water	calcium	1 super

1/30	73	52	86.2	62	60s	8:14 up and moving, back in sleeping spot around 8:45, taken to vet - was alert and active at vet clinic. Tested negative for parasites, physical health looks good. suspected stress or other internal distress at this time. Will monitor him at home with less traffic to see if this helps with his behaviors. Enclosure has been covered on 3 sides with black trash bags to help ensure feeling of safety			hydrated urate, solid poop
1/31	72	47	90	61	89	9:50 out of sleeping spot; out of sleeping spot all day until 5:09, can see in camera his eyes are moving around and he is moving head in camera, eyes seemed to finally close around 5:45	Calcium	2 silks, 8 crickets - didnt eat any	
2/1	70	47	80	64	77	8:07 moved from sleeping spot, out most of day from what I could tell, we were not home a lot so heater was off more than on and we couldn't monitor as much. Went into sleeping spot around 4, checked on him at 5:45, eyes closed	Calcium	2 horn	
2/2	70	55	85	63	86	9:13, still in sleeping spot, turned up heat to 72 ambient and then he moved around 9:20, back in sleeping spot 10:56 can see eyes are open; at times I cannot tell if eyes are closed but his head is down in his sleeping position, suspecting eyes are closed; 3:34 still in sleeping spot, cant tell if eyes are closed, head is tucked in like he is sleeping			
2/3	70	54	86	64	86	8:00 moving out of sleeping spot, camera is close to enclosure to help see if eyes close in sleeping spot during the day. Moved back to sleeping spot at 9:47, 12:12 no longer in sleeping spot, 4:14 in sleeping spot, some activity in room adjusting heater.	Calcium	2 super, 8 crickets - ALL EMPTY
